Product information

As part of the new generation of the Tuscan family, the Tuscan G2 CMS Class II luminaire combines improved efficiency, enhanced impact resistance, and a refined modern aesthetic. The specialist diffuser material provides a soft, uniform lit appearance, complemented by the durability expected from the Tuscan range. Designed as a cornice system, the Tuscan G2 CMS Class II luminaire efficiently directs light where it's needed.

The innovative modular design delivers flexibility, speed and precision throughout installation. Adjustable sections and corner modules accommodate on-site building tolerances, minimising fitting errors and helping to achieve a faster, more accurate installation. The three-compartment CMS enables power and service cables to be installed during the first-fix stage, while luminaire modules and infill covers can be fitted at uniform intervals during the second phase. This phased approach streamlines installation, reduces programme risk, and ensures a clean, consistent finish.
